

ACE: ELECTROSTATIC EQUIPMENT AND WEB CLEANERS FOR PRINTING AND CONVERTING INDUSTRIES.

ACE di Barbui Davide & Figli S.r.l. is a worldwide leader company conceiving and producing electrostatic equipment and contact / no contact web cleaners for over thirty years. The whole range of ACE equipment includes: ACE Rotostatic (ESA Electrostatic Printing Assist system) for rotogravure printing, web cleaners for cleaning of films, paper, paperboard, tissue, Ex static elimination equipment for coating, laminating and rotogravure presses, static elimination equipment for waste conveyor systems, electrostatic systems for offset and roto-offset presses, electrostatic equipment for flexo print of film, paper, board, electrostatic systems for BOPP and cast-film extrusion lines.

At its booth, ACE will introduce to the market its latest developments for both ESA Rotostatic and web cleaning devices.

The new and original ESA system provided with the revolutionary 'TOTAL CHARGE' will guarantee a higher electrostatic charge that is more uniform and intense, and will allow outstanding printing quality results, both for flexible packaging and publications sectors.

The computerised supervision system SCT, then, allows the operator to monitor continuously the electrical system in order to have both perfect performance and full safety of the ESA system.

Converflex 2009 will also be the occasion to show the new model of the "contact" web cleaner AR800 which, thanks to its peculiar and brand new working principle, grants finished products completely free from contamination.

ACE is currently the only company around the world that is able to offer such a comprehensive range of products for printing and converting industries: ACE, your partner for electrostatic and web cleaning solutions.

We look forward to meeting you at the ACE stand number C30 – Hall 10
