

AGFA GRAPHICS SRL

TECHNOLOGY OVERVIEW GRAFITALIA 2009 AGFA GRAPHICS

Agfa Graphics will present three main news at Grafitalia 2009, all to confirm and underline its technology leadership achieved during the last years.

Apogee Suite, Agfa's workflow now at the 6.0 release, where automation and flexibility are at the best level is the first important news. More connectivity with digital printing, integration with Agfa's editorial module called Apogee Media, integration with MIS systems through JDF/JMF, integrated solutions for file management into the workflow, complete colour management included the repurposing and ink save modules to save ink consumption, these are only some of the whole news of the new Apogee Suite, which is today completed by the new counterfeiter module called Secuseal, now at the release 2.0.

Azura, the thermal digital processless plate more diffused to the world, has been renewed, becoming even more convenient for the end-users. Azura TS, the second generation of thermal processless, guarantees great productivity to every CTP systems, increasing the throughput up to 30%.

Also Amigo, the thermal processless plate for high runlength of Agfa Graphics has been renewed, guaranteeing great productivity to the CTP systems and so also allowing the high volumes consumers of printing plates to have benefits from the consequential competitive advantages from the sturdiness and ecology of the Thermofuse technology patented by Agfa Graphics.

At Grafitalia, you will be able to verify together with Agfa Graphics as to implement an environmental sustainability path within your company, contemporarily increasing the development of your business. Besides the ecological products, specific software modules and the technological novelties, Agfa Graphics can propose you a plan of sustainable development of your business thanks to specialized partners.

We wait for you all at Grafitalia.
