

DUPLO ITALIA SRL

DUPLO ITALIA WILL SHOWCASE DURING GRAFITALIA HIS COMPLETE FINISHING SOLUTIONS RANGE.

Duplo is proposing more automated and reliable product, that could be able to satisfy modern printers' needs allowing them to widen their offering through high value finished products.

Duplo solutions are designed for printers who wish to finish printed jobs in house adding value and creating finished products avoiding to outsource them in order to guarantee flexibility, save of time and money. Duplo will introduce new solutions during Grafitalia and among them there will be DPB-500 dubinder with pur option that produces a strong bind both on laminated and digital stock. There will also be new System 3500 which enlarging the range of bookletmaker systems could be positioned between System 5000 and System 2000, both present on Duplo booth. System 5000 will be exhibited for digital print with DSF-5000 sheet-fed and SCC module with in-line slit/cut/crease. Newly introduced by Duplo is the Ultra 205 A UV coater, that applying a gloss or satin finish to printed documents will increase their brightness. Also DC-445, DC-615 Pro e DC-645 will be exhibited, they provide multi-functional finishing solutions in one compact, easy-to use package and are designed for digital market, though they are successful also among offset printers. The range of Duplo proposals is completed with new digital duplicators and innovative direct marketing collator EsperDM-19.

DUPLO ITALIA srl

Duplo Italia was established in 2005 and is the subsidiary on national territory for the sale and service of Duplo products. This brand is well known for his reliable, automated and easy to use solutions whose flexibility enables to propose every time an ideal system to meet specific requirements of each single customer.
