

## FORA GRAFICA: HIGHLY PERFORMING CHEMICALS AND BLANKETS FOR THE BEST PRINTING SOLUTION.

Ideal solutions; from the “no emission project” to the reduction of industrial costs 3 E: Ecology, Economy, Evolution.

During GRAFITALIA 2009, FORAGRAFICA, who has always followed the demands and evolutions of the printing industry, will present brand-new products and solutions, which are bound to become a cornerstone of the field.

The “NO EMISSION PROJECT”, an already operative reality, has been developed in cooperation with our represented Companies, DS DRUCKEREI SERVICE and BLUEPRINT PRODUCTS, and thanks to the contribution of PHOENIX and SAVATECH. This project carries out the elimination of VOC emissions in pressroom. Highly technological founts, IPAFIX as substitute of isopropyl alcohol, ROTOWASH BIO and BLUE CLARIS are some of the products which contribute to the achievement of the project’s optimal results, guaranteeing a reduction of industrial costs.

PHOENIX CARAT will present AMARANTH, its brand-new blanket for HIGH SPEED HEATSET machines with heat-dispersing system to reduce build-up and the new STICKY BACK for narrow-web heatset. The CARTON PRINTING field will be completed with the ODOURLESS UV coatings and the SAVA coating blanket STRIPPING 3, easily strippable, ideal for difficult varnishing spots and remarkably stable thanks to its polyester substrate. Besides, there is always ADVANTAGE PLUS, which shows excellent performances on new generation sheetfed presses and highly satisfies the requests of industrial costs reduction.

During this occasion, the associate BLUEPRINT PRODUCTS will make its official debut presenting its new range of products for new generation printing with high performances.

To discover our FURTHER NEWS, we wait to meet you for a TASTY break at the FORA GRAFICA booth, where hospitality and courtesy will be the main characters of this event.

FORA GRAFICA, a society controlled by FORA SPA, has worked in the graphic field since 1975; its main goal is the selection throughout the worldwide market of the best products for the graphic industry, availing itself of its represented companies support and of a highly skilled and helpful TECHNICAL STAFF.
