

FORGRAF SRL

Forgraf, the ideal partner for the professionals of post-press

Forgraf is a company specialized in supplying machines and equipments for post-press finishing. Its products, currently selected among the best brands of the market, cover all finishing demands of the Commercial Printing Companies, Centers Press and Binderies both, for digital and offset applications.

Forgraf Srl introduces on the occasion of Grafitalia 2009 a complete range of highly professional and innovative machines.

Among **Horizon** proposals we find the tested lines of high speed collators **VAC-100** and **VAC-60H**, the totally automatic bookletmaking machine **SPF-200A + FC200A**, the saddle stitching and finishing system **StitchLiner 5500** and **6000**.

Among the **novelties Horizon** we find the single-clamp and multi-clamps perfect binders in **HotMelt** version or in the new polyurethane version (**PUR**).

Other proposal **Horizon** are 50x70 sheets size folders, as the fully automatic **AFC-566F** equipped with 6 buckle plates, 1-cross knife and 2 buckle plates under the knife. All the necessary regulations, included those of the fold rolls and suction head position are effected in automatic way in maximum of 30 seconds. Another totally automatic folder is the **AF-566FT4F** model with 6 buckle plates + 4 buckle plates unity that can be installed in axle or in cross.

Among **Hohner** proposals we find the **HBS 10000** fully automated saddle stitching system, with three knife trimmer and compensating stacker, ideal for medium and large productions. The set-up change is allowed very quickly with a production of 10,000/hour copies.

Other new proposal are the **Schneider-Senator** guillotines and a whole series of complements to optimize the paper cutting cycle, savings time and costs up to 70%.

The Dry laminating machines by **Tauler** are the best market products in the lamination market for printed sheet. More than 40 years of experience guarantee the quality of its products.

For digital printouts **Morgana** introduces the **Digifold 5000P**, the new unique creasing/folding machine in the world. A project covered by different international patents, that technologically revolutionizes the processes of creasing and folding; thanks to an innovative system of mobile matrix and knives it folds up unthinkable productions are gotten till now, up to 5000 sheets/hour creased and folded up.

Morgana Digicoater is a totally automated and compact system, for printouts coating of both, digital and offset and "Primer" paper treatment. The machine uses a low pile feeding unity with suction feeding and one coating and drying unity with UV lamps.

Company profile:

Forgraf is the Italian exclusive dealer of following prestigious trade marks: **Horizon**, **Hohner**, **Schneider-Senator**, **Morgana** and **Tauler**. Sales and Assistance are performed on all national market through a network of Specialists.

Forgraf offers a complete range of finishing equipments: collators, perfect binders, folders, bookletmakers, saddle stitching systems, creasers, laminating machines, spine taping machine, numbering machines, paper drilling, staplers, linear and three-knife cutters, integrated feeding systems with perfect binder and three-knife cutter all in a single cycle.
