

## **KONIGPRINT SOLUTION SRL**

### **SOLUTIONS FOR DIGITAL PRINT**

Technologies of digital print and finish dedicated to the print of color labels in narrow band.

KONIGPRINT SOLUTION is a young and dynamics firm born to satisfy the always more request of little production of colour labels of high quality, with low costs and short times.

Our solutions, study for the narrow band, begin from the simple neutral roll, in the most different materials, to arrive to the finished label.

The sophisticated technology Digital Laser, united to the group of cut, constitute a true center print for the labels of small production.

Points of strength of the solutions KONIGPRINT are the simplicity in the use of the equipments, the rapidity in the realization of the products and the ample range of materials on which to print.

Our technology allows in fact to print on the most different types of papers, from the simple "vellum" to "laid" or "antique", arriving the plastic materials more diffuse as the polypropylene, vinyl or polyester. Important consideration is that all these materials don't need special treatments, but they are used in their original state.

Fundamental importance introduces the line of cut, that allows to realize rolls of labels ended of any form without having to create socket punch. In fact the versatility of our solution eliminates the demand of the socket punch, for a long time obstacle of the small productions for the incidence of the costs, allowing to draw a high profit margin. This point of strength of our solutions doesn't exclude however the possibility to use rolls of labels already shape and what they need only print of high quality.

The solutions KONIGPRINTs offer and they satisfy an ample and variegated demand of market.
