

MAG SERVICE SRL - CITO-SYSTEM GmbH

PARTNERS FOR SUCCESS

CITO is one of the leading companies worldwide in the area of print processing. For more than 100 years CITO, based in Nürnberg has dealt with the processing of paper and board; the core expertise of CITO is creasing, cutting and perforating. The products and services are split into two fields of business, i. e. BoxLine and PrintLine.

BoxLine: Here the subject of “processing on flatbed diecutters with steel rule dies“ is addressed. On the CITO stand in hall ??, alongside our renowned creasing products, you will also find every possible diecutting product you may require and of course the respective products in the usual CITO quality. You can also obtain outstanding technical advice by speaking to our diecutting experts on the CITO stand.. With regard to creasing you will see the whole series of matrix available consisting of the PRO, STANDARD, BASIC and PLAST ranges; so you can obtain exactly the right product for all types of jobs and take advantage of the unrivalled CITO price-performance ratio.

In the field of PrintLine the subject of inline finishing on offset printing machines is addressed, a technology which has gained more and more acceptance in recent years. For many types of jobs, the possibility of inline finishing during the printing process is not only a real alternative, but also an extremely economical process. With regard to Inline Finishing CITO collaborates with another world market-leader, Heidelberger Druckmaschinen AG. Of course the RSP system can be used on all printing machines up to format 3B from the house of Heidelberg regardless whether you use CD 74s, SM 102s and XL 105s. With the RSP system you will gain flexibility and easily win an additional value added.

The area of Research & Development is rated very highly within CITO which is obvious to see when visiting stand B?? in hall ??.

The CITO stand will be held together with our long time partner MAG Services S.r.l.

We are very much looking forward to welcoming you at our stand during Converflex 2009!
