FOLDER GLUER – WINDOW PATCHING MACHINE – AUTOMATIC SHEET LAMINATOR: A GOOD RANGE OF SOLUTIONS MADE “ON CUSTOMER’S NEEDS”.

Vega SpA will attend the Converflex Exposition showing No. 4 machines, of which, no.2 Vega folder gluers, no.1 Stock sheet laminating machine and no.1 Kohmann window patching machine. The Italian Group’s goal, in such a difficult world market situation, is to be a point of reference from the solid and corrugated board sheet laminating to the window and gluing of blanked boxes. That’s why the Italian Company, together with its two German suppliers, will be exposing the new model of folder gluer of small size, flexible and affordable: the Vega Mira 62, the most performing for big sizes: the Vega Altair 160, the new generation automatic sheet laminating machine from Stock and the window patching machine from Kohmann, the Universal Model. Sure of focusing the customers’ attention thanks to its European product and its sixty years tradition the Vega group will also introduce interesting news concerning the three kinds of production starting from the machines themselves till important accessories of new generation.
